

The Board of Pharmacy has received notice of the following product recall. The Board strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.

Pfizer Inc. is recalling the above referenced lot of Mektovi Tablets as the expiry date on the product label is incorrect. The label states an expiry date of March 2026; the correct expiration date is February 2025. Pfizer completed a Health Hazard Assessment which concluded that the use of the impacted product has a very unlikely probability of being associated with adverse events other than those expected from the safety profile of the drug itself and as described per label. The potential risk to a patient arising from this issue is considered to be low, and the lot at issue is within its shelf-life at this time.
