

The Board of Pharmacy has received notice of the following product recall:

Description	Lot #	Exp Date	NDC #	UPC #
FLUOROUR PBP 5GM FRE 100ML	6120420	04/30/20	63323011761	36332311761
FLUOROUR PBP 5MG/100MLFRENOV+	6120341	04/30/20	63323011769	36332311769

Fresenius-Kabi is recalling the above item(s)/lot(s) due to glass particulates found in 5 vials of the remaining inventory of lot 6120341 during an inspection for a quality investigation. Lot 6120420 is included in this recall as a precautionary measure because it was filled immediately post lot 6120341 as part of the same filling campaign. The administration of glass particulate, if present in a parenteral drug, poses a moderate safety risk to patients. Reports in the literature suggest that sequelae of thromboembolism, such as pulmonary emboli, phlebitis, granulomas, or fibrosis may occur. This recall is to the Health care Professional level. Affected product started shipping December 06, 2018.

The Board of Pharmacy strongly encourages pharmacies to immediately review their quality assurance and recall policies and procedures to determine if any corrective action is required.
